

Total Asset Visibility—Pilot Project Overview

Knowledge Ops, Inc. provides the drilling industry with a new approach **BLOWOUT PREVENTER INTEGRITY MANAGEMENT PROCESS**. Combining deep field operations experience with a proven implementation process, the Knowledge Ops team provides this overview of our approach and pilot project outline to assure your blowout preventers meet the forthcoming License to Operate criteria. Our pilot project goals include:

- ❖ Ascertain viability,
- ❖ Determine economic value, and
- ❖ Define the implementation process for a broader deployment across the enterprise.

This document is based on Knowledge Ops current understanding of the nature of the field operational issues. Subsequent discovery and discussions will provide the specific: 1) Scope of Work, 2) Deliverables, 3) Timeline and 4) Pricing.

Leveraging existing technologies and processes, Knowledge Ops will develop a pilot project focusing on Blowout Preventers (BOP) Integrity Management that will provide a scalable Total Asset Visibility Information Management Process meeting today's emerging challenges.

We believe this will positively impact your compliance process, increase safety, stakeholder confidence, and competitive posture.

Deliverables will include a Proof of Concept solution tailored to the specific requirements to manage BOP integrity and compliance requirements. Moreover, Knowledge Ops understands the nature of operations. Our solution requires minimal impact during this pilot phase and is provided as a minimal risk business model.

Deliverables include:

- The Initial Site Survey both in two locations (yard, warehouse, drilling rig)
- The Preliminary Process Assessment
- The Preliminary Architecture and Taxonomy Development
- Proof of Concept level working solution
- The Return on Investment (ROI) development and final presentation to management (including the Go Forward Plan for the project role out)

Contact us for a no cost proposal tailored to meet your specific requirements for
BLOWOUT PREVENTER INTEGRITY MANAGEMENT
